CARL CROPP

Born February 4, 1861. Died June 30, 1946

In memory of our beloved vice president, former secretary and treasurer, Mr. Carl Cropp, who passed away on June 30, 1946 after a brief illness.

Mr. Cropp was born in Erfurt, Germany, February 4, 1861. After his school days' training was over he served his apprenticeship in his father's seed house. Completing this course he went to France and England for further experience. Landing in New York in 1883, he was employed by the B. K. Bliss Seed Company for one year. He then came to Chicago to join the J. C. Vaughan Seed Company and established the flower seed department in this firm where he remained for 62 years of continuous service.

When Vaughan's was incorporated in 1901, Mr. Cropp was made treasurer, later becoming vice president and secretary. Besides maintaining his seed interests, a close contact with the nursery industry was established.

One of the pioneers in the American business of growing flowers and flower seeds, Mr. Cropp took an important part in its growth and expansion. He

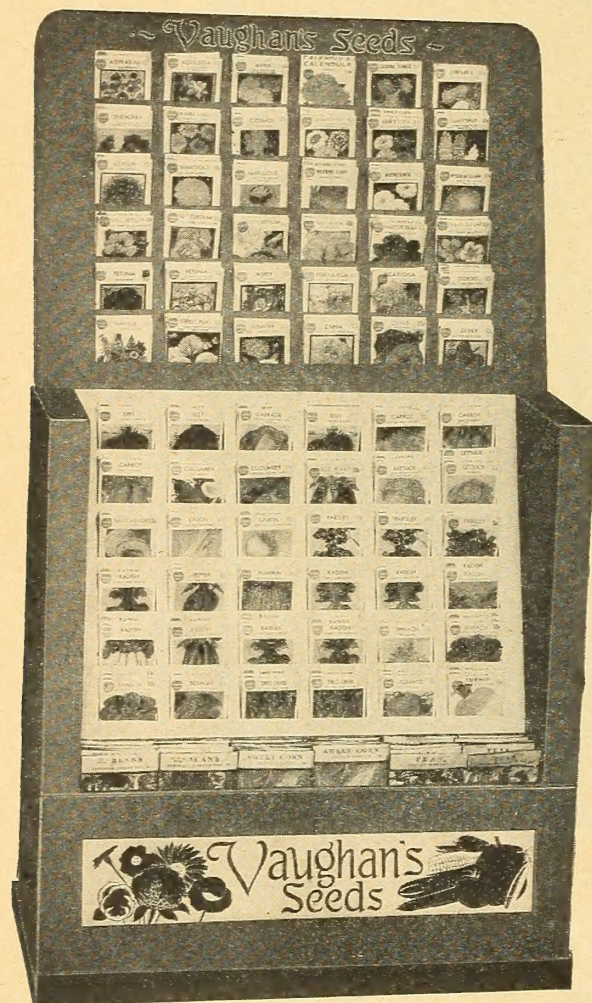

was closely associated with both amateur and commercial flower production and, while maintaining contact with flower seed growers throughout the world, encouraged the flower seed business in this country until a great share of the flower seeds used in the world today is American-grown.

Mr. Cropp enjoyed world-wide recognition as an authority on flowers and flower seed production. In 1938 he was presented with a trophy for outstanding achievements in horticulture by the All-America Selections Council at its annual meeting. He had also served as one of the All-America judges since the council's organization. He was especially active in the mail-order group of the American Seed Trade Association, but he also gave his close attention to almost every other phase of seedmen's work.

Besides his widow, Mr. Cropp is survived by a son, Carl V. Cropp, who is now head of the flower seed department at Vaughan's where he served as his father's assistant, and is vice president of the corporation.

Flower Seeds in Record Breaking Demand

Vaughan's Packet Seed Assortments have a selection of flower seeds which few seed stores can equal, and flower seeds will be the "hot" item this spring. Home gardeners will tend to concentrate also on the luxury vegetables of super-quality, in which we specialize. This is a business which belongs to the florist, and Vaughan's Seeds a line which he can recommend. They are not on sale by every other outlet in your neighborhood. Make sure of your assortment by ordering early.

OUR COLORFUL DISPLAY RACK

Attractive Two-Tone Display Rack

For 1947 our light-weight, decorative display rack will be made in combination of buff and green, which is attractive in itself and will harmonize with your store display.

Design and construction of the rack will follow the model which has proved so satisfactory last year.

The illustration shows how it holds each variety where the customer can see it.

The dimensions of this rack are: 30 inches wide, 15 inches deep, on the floor. The height is 55 inches, nicely calculated to combine maximum visibility of packets, and convenient self-service, while at the same time it does not obstruct a clear view of the store, which many feel is important.

Your new rack will be light, yet strong, easily moved about. It is made in the modern manner, of heavy matboard, and comes to you brand new. One rack will hold \$100 worth of packets.

Our New Packets. All flower seed packets of 1947 will be 3¼ by 4½ inches, same size as vegetable packets, and all racks will be interchangeable, serving for either flower or vegetable seed.

Brilliantly Colored Posters and Streamers. Color sells everything now-a-days and nowhere is it more necessary than in selling the garden. Vaughan's posters are modern, artistic, brilliant. They will dress up your store and give it the atmosphere of spring, helping business in every line.

TYPICAL PLANT OF PETUNIA LITTLE GIANT

Early Easter in 1947

Easter in 1947 occurs on April 6, and florists, as well as growers who must properly time crops for that day, should mark the date on their calendars. The latest possible date for Easter is April 25, and florists may remember that this was the Easter date in 1943. The date of Easter falls invariably on the first Sunday after the first full moon occurring on or after March 21.

Our Front Cover Petunia

Ruffled Nana Compacta Little Giants, 8-12 inches tall. The medium sized, well ruffled and waved, deep-throated flowers continue to keep the plants completely covered. The unusually attractive colors range from deep crimson to white in every imaginable shade and combination of markings. Excellent for borders, bedding and pots. An outstanding florist item. Trade Pkt., 75c; $\frac{1}{4}$ oz., \$1.40; $\frac{1}{2}$ oz., \$2.50; $\frac{1}{16}$ oz., \$4.50.

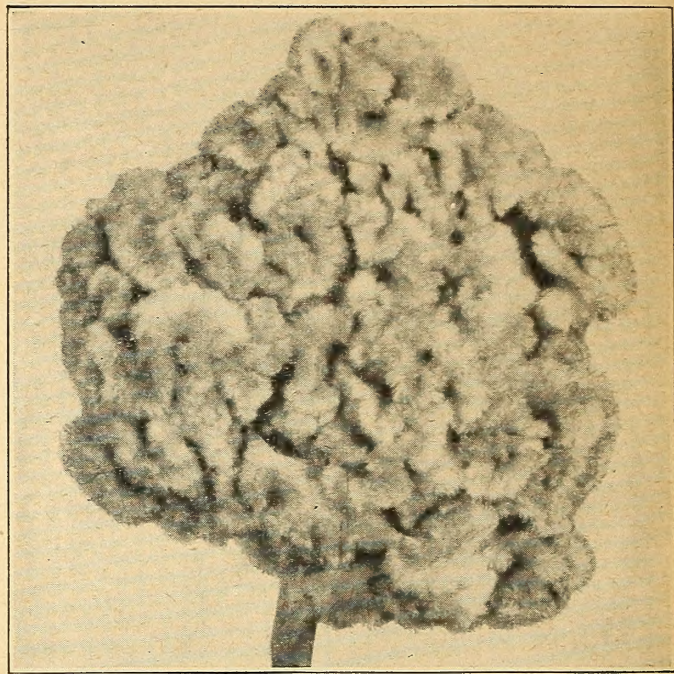

On Inside Front Cover all Double Petunias

All-Double America. Silver Medal All-America 1943 is the all-double type, of medium size, 100 percent carnation-flowered, and rose-pink in color. It supersedes the Double Rosy Morn with same color and growth. America Petunia is a hybrida nana, an abundant bloomer from early summer to frost; for bedding and cutting. Uniform and true. See inside front cover for illustration in color. 500 seeds, \$1.50; 1000 seeds, \$2.50; $\frac{1}{4}$ oz., \$7.50; $\frac{1}{2}$ oz., \$13.60.

Colossal Shades of Rose, Winner of All-America Silver Award for 1946. The first Giant All-Double Petunia produced in America. These giant double blooms are up to 5 inches or more across on vigorous compact plants, and are especially valuable for pot plants. This blend of colors come in rich rose shades, from salmon-pink through rosy-pink to deep rosy-mauve. Start seed early, grow cool near the glass and give plenty of room. These will make fine 4 to 5-inch pot plants for Easter, Mothers' day and spring combinations. Trade pkt., \$3.00 net.

CELOSIA GIANT ROSE BEAUTY

Scientific Snapdragons

Giant Ruffled "Tetra-Snaps." A new race of snapdragons created scientifically, which made a fundamental change in the cell formation, resulting in larger flowers, with thicker petals, attractively ruffled, fuller spikes with more florets open at one time, heavier stems and sturdier plants. Each plant produces several stems, the central spikes averaging $2\frac{1}{2}$ ft., surrounded by lesser ones. Mixture includes a complete range of snapdragon colors in harmonious combinations. Trade pkt., 50c; $\frac{1}{16}$ oz., 90c; $\frac{1}{8}$ oz., \$1.70; $\frac{1}{4}$ oz., \$2.75; oz., \$10.00.

Tall growing and base branching, valuable for garden and cutting. Trade pkt., 35c; $\frac{1}{16}$ oz., 60c; $\frac{1}{8}$ oz., \$1.00; $\frac{1}{4}$ oz., \$1.75; oz., \$6.50.

Improved Begonias

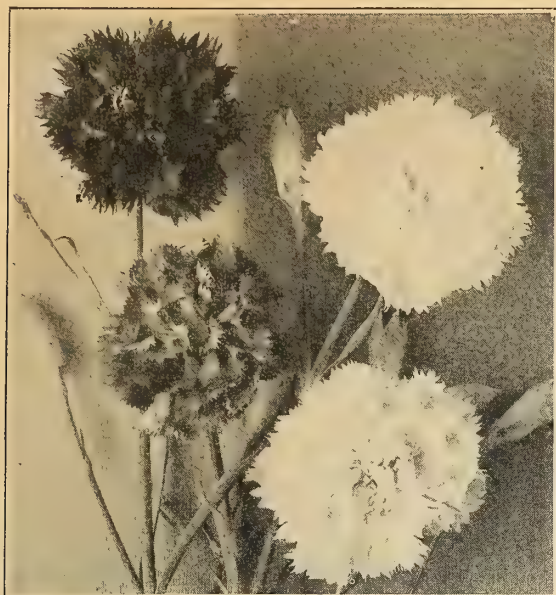

Double Tuberous Rooted Vaughan's Special Mixture. This cream of a specialist's collection contains the lovely camellia and rose flowered forms together with the double fringed types in charming colors from dainty light shades to the richer and darker tones. Seed sown in January or February make good sized plants by August. Leaflet on culture supplied with seed. Trade pkt., \$2.50.

Ball Red. Fairly dwarf in growth and of uniform, perfectly rounded habit. The plants are literally covered with medium large flowers of the brightest scarlet red imaginable. Much more brilliant and intense than King of the Reds or Luminosa. Trade pkt., \$1.00; $\frac{1}{4}$ oz., \$2.75; $\frac{1}{2}$ oz., \$5.00.

Ball Deep Rose. Identical in habit to Adeline from which it was selected. Under winter and spring conditions the color is a deep rich rosy red which gradually fades to a bright luminous pink with the coming of warmer weather. Trade pkt., \$1.00; $\frac{1}{4}$ oz., \$2.75; $\frac{1}{2}$ oz., \$5.00.

Decorative Pop Corn

Strawberry Corn. While this is really a "Pop Corn" and a very good one at that, its charm is in its attractive effect of the tiny ears which are only 2 in. long and $1\frac{1}{2}$ in. wide and are a rich and shiny mahogany color, not unlike a gigantic strawberry. They are enclosed in straw-colored husks which may be bent back showing the ear. Stalks sold in the market at 10c each. Oz., 30c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.60.

CARNATION J. M. Bridgeford

Garden-type Carnations

Malmaison J. M. Bridgeford. Of sturdy habit, upright growing plant bearing large flowers. $3\frac{1}{2}$ to 4 inches across, all being of equal size. The chief merit lies in the extensive color range. Some 25 different colors have been counted. Trade pkt., 50c; $\frac{1}{8}$ oz., \$1.10; $\frac{1}{4}$ oz., \$2.00.

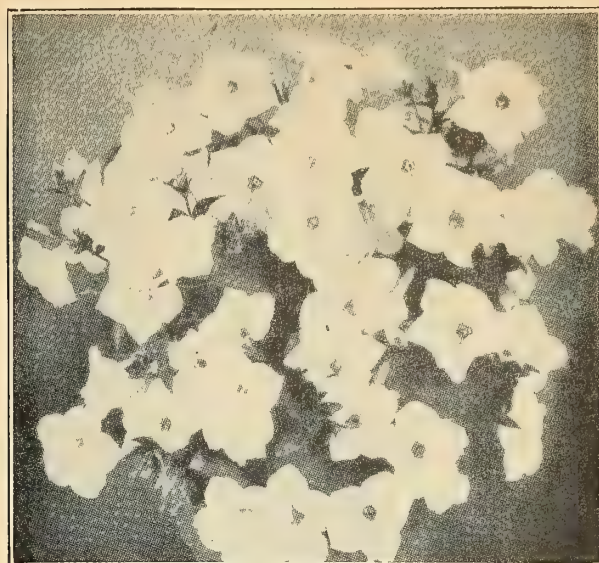

Super Giant Mixed. A strain similar in habit and earliness to Chabaud Giant Improved but with extra large flowers. Very double and strongly clove scented. Trade pkt., 50c; $\frac{1}{4}$ oz., \$1.65; oz., \$6.00.

Grenadin Dwarf Bright Scarlet. Double flowers of rich intense scarlet, exceedingly showy. Compact plants each a bouquet. Blooms from seed first year if sown early. Trade pkt., 50c; $\frac{1}{8}$ oz., \$1.40; $\frac{1}{4}$ oz., \$2.50; oz., \$8.00.

Prof. Malmgreen. A new early flowering Vienna dwarf double type with gay brick red flowers. Fine for cutting. 14 in. Trade pkt., 50c.

Grow Cotton Blossoms

Ornamental Cotton. Sown indoors and transplanted after danger of frost is over, cotton plants develop quickly into low bushes of definite ornamental value, with lovely pink buds followed by creamy blossoms. The white bolls make winter bouquets. Sorry, can not be sent to California against quarantine regulations. Trade pkt., 25c; oz., \$1.25.

PETUNIA Hyb. Nana Comp. White Perfection

Latest in Celosias

Gilbert's Maple Gold. The blooms are the crested type. The color is an attractive pink-tipped yellow but may vary somewhat. Plant grows about 30-36 in. tall with 8-12 heads normally, more if center is pinched. Trade pkt., (300 seeds), 50c.

Gilbert's Giant Rose Beauty. The plant grows about 3 to 4 ft. tall, non-branching unless pinched when less than 12 in. tall. Foliage bright glossy green. Stems are round, strong and straight, carrying flower heads when full grown, 8 to 12 in. or more across; very ruffled and ball shaped. The color is rather uniform bright rose pink, on a silver colored base; makes an excellent cut flower, holding its shape and color better than usual. Dries perfectly after being used as a cut flower, that is, cut and placed in water for nearly a week, it may be stripped of its leaves and hung up to dry for winter bouquets. Trade pkt., 50c.

True Blue Larkspur

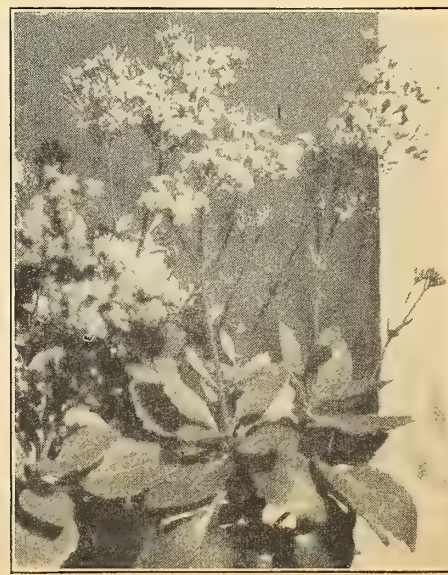

Blue Mirror. This Chinese Larkspur has no spurs and it shows its bright navy blue flowers most effectively by their horizontal position. Height $1\frac{1}{2}$ to 2 feet. May be cultivated as an annual as well as perennial, and is finely suited for cutting purposes, for groups and borders. Trade pkt., 50c; $\frac{1}{4}$ oz., \$1.00; oz., \$3.60.

Yes. No.

Carl Cropp, vice-president and secretary-treasurer of Vaughan's Seed Store, Inc., died June 30, 1946, as reported elsewhere in this issue. He had organized the flower seed department and directed it for sixty-two years.

While Mr. Cropp continued in active charge until a short time before his death, for several years he had shared his duties and responsibilities with his son Carl V. Cropp, who has succeeded him as vice-president of the firm, and manager of this department.

The organization trained by Mr. Cropp will continue to observe the high standards and extreme care upon which he insisted, and customers can depend upon receiving the best seed obtainable in the world.

TESTING

Every lot of flower seed sold by us is tested in OUR OWN laboratory, where we prove the germination and make certain that the percentage is up to the high level of our standards.

Flower Seeds for Summer Sowing—We issue a special catalogue in June. Should you fail to receive one, please write for it.

For Seeds of Perennials and Biennials, see Pages 38 to 51.

Trade packets contain considerably more seed than ordinary or retail packets, being based on Florists' needs for commercial purposes.

Florists invariably get trade packets unless otherwise specified.

Quantities of $\frac{1}{4}$ lb. and over are charged at the pound rate; unless stated otherwise, $\frac{1}{8}$ lb. is at the oz. rate; $\frac{1}{2}$ oz. is at the ounce rate only when the price per ounce is 20c or more and $\frac{1}{2}$ oz. rate is not otherwise quoted.

We do not sell $\frac{1}{2}$ oz. where the price per ounce is 15c or less.

Cash Discounts on Flower Seeds: On all orders for flower seeds, totaling less than \$25.00, 5%, and over \$25.00, 8%, may be deducted if cash is enclosed, except Cyclamen seed, which is net.

Giant Ruffled "Tetra-Snaps"

A new race of snapdragons created scientifically by treating normal flowers with the drug colchicine, which made a fundamental change in the cell formation, in technical terms changing diploids into tetraploids. This resulted in larger flowers, with thicker petals, attractively ruffled, fuller spikes with more florets open at one time, heavier stems and sturdier plants. Each plant produces several stems, the central spikes averaging 2½ ft., surrounded by lesser ones. Mixture includes a complete range of snapdragon colors in harmonious combinations. ¼ oz., 90c; ¼ oz., \$1.70; ¼ oz., \$2.75; trade pkt., 50c; oz., \$10.00.

ASTER Wilt Resistant Crego

Asters WILT-RESISTANT

Good news for all who have had trouble growing asters, is that D.D.T. Dust, the new insecticide, will kill leaf hoppers, which transmit the yellows disease, for which there has hitherto been no reliable treatment. Occasional spraying or dusting with this lasting insecticide should protect your asters from infection, which is the chief enemy of these beautiful flowers in sections where the wilt disease is not established in the soil. Wilt resistant varieties are resistant only to wilt, but in general are more vigorous, and less susceptible to other infections. Whenever a variety can be offered in a wilt resistant strain, we omit its non-resistant counterpart from the list.

As the roots of Asters are produced near the surface, a mulch of some kind spread over them in hot weather is very beneficial and will be repaid by fine plants, large blooms, stronger stems, and more profuse blooming.

CREGO—2 feet

This flower is giant in size, many blossoms six inches across. The petals are nearly double the length of the older varieties and are twisted and curled into a very fluffy effect. Comes into bloom in August, continuing well into September. A splendid keeper and shipper.

PANSY VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

PANSIES

Pansies have long been a favorite with us. We introduced the Swiss Giants to American gardens and named and introduced the lovely Canadian variety, Maple Leaf, several years ago.

VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

The flowers of this strain are of enormous size, 3 inches and over in diameter. They are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. Thick petals, of a rich velvety texture, give this strain of pansy the required substance so necessary to a perfect pansy.

The superb colors and color combinations—are their distinctive feature. Excellent for greenhouse culture. Trade pkt., 60c; $\frac{1}{8}$ oz., \$1.30; $\frac{1}{4}$ oz., \$2.25; oz., \$8.00; 4 oz., \$30.00.

VAUGHAN'S SUPER SWISS GIANT MIXTURE

One of our leaders and represents the choicest strain of this popular and profitable flower. Combining the finest selections of several Pansy specialists, the perfect blending is further insured by the addition of separate colors that do not generally appear in the average mixture. Trade pkt., 75c; $\frac{1}{8}$ oz., \$1.50; $\frac{1}{4}$ oz., \$2.75; oz., \$10.00; $\frac{1}{4}$ lb., \$32.00.

DWARF CALIFORNIA GIANTS IMPROVED

(Vaughan Blend)

Flowering begins early, when the plants are very small, so that salable plants are quickly produced. Plants sell on sight. They are bushy, grow about 12 in. high and produce their immense open faced, deeply ruffled flowers freely. Some are self colors veined in a contrasting shade, some combine two or more colors in the same flower in a wonderful color harmony. The dark rich colors predominate. ZINNIA Scabiosa Flowered

ANCHUSA Italica Dropmore Variety

ALYSSUM Saxatile Compactum

ANTHEMIS Tinctoria

We recommend sowing perennial seeds in spring. Seed germinates better in the cool weather than in the heat of mid-summer, and the long growing season produces larger plants that winter over more successfully.

Seeds of Biennials and Hardy Perennials

Perennials fill a large and interesting place in the operations of an up-to-date florist establishment. Some are as easily raised as annuals; quite a few may be forced; others make fine pot plants; and many furnish splendid cutting material. The rock garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to perennials of all kinds. They require little heat, if any, and not much care.

SEED GERMINATES SLOWLY AND IRREGULARLY

Of the following varieties and a seed bed should be prepared where it will be undisturbed for a year or more.

Aconitum, Anemone, Clematis, Delphinium Cardinale, Delphinium Nudicaule, Dictamnus, Dielytra, Iris, Phlox Decussata, Primulas Trollius and nearly all Alpines.

They are highly valued for cut flowers. Our mixture contains many bright shades of yellow, salmon, orange and scarlet. They do best in a light loamy soil enriched with leaf mould and a little lime, no manure. Where the ground freezes deeply in the winter, they can be treated as gladioli. But in localities where the ground does not freeze deeply, the usual winter protection may be given, and they will multiply.

The Gladiolus situation this year with regard to labor in harvesting and cleaning is somewhat improved over last year, but stocks have not increased enough as yet to say there will be plenty for all. With so many early booked orders on file, we still say, "Get your orders in early from this book" and please allow us to send good substitutes in case we are out of the variety you order. The variety Picardy is still short in supply because of a rot which developed a few years ago, but it is the pink the customers want.

CHRYSANTHEMUM NOVELTIES

GOLD COAST (Baur-Steinkamp). A small deep lemon yellow pompon blooming normally October 25. It lends itself ideally to early shadings. Its clean, vigorous free growth habit is outstanding. In growth habit and production, it is very similar to Pinocchio. It is one of an important trio for early shading . . . Gold Coast, Pinocchio and Carolyn Yosick. The flower is small and firm; the color is intense. Easily grown and consistently dependable—a top notch cloth house variety. We recommend Gold Coast as the best yellow pompon for early shading. **Price, \$7.00 per 100.**

DEBONAIR (Yoder Bros.) A rich crimson red decorative pompon that blooms normally December 5. The beauty and symmetry of its form combined with the velvety gloss of its rich and intense color has never failed to create enthusiastic comment. Shaded to flower for the 1945 National Chrysanthemum Show in Cleveland it took top honors in seedling competition. Moderate temperatures, optimum light intensity and other environmental conditions which promote a firm wood and gradual elongation of stem and spray best suit this variety. Debonair can be lighted for the Christmas Season. **Price, \$9.00 per 100.**

BROCADE (YODER BROS.)

DARK PINK ORCHID QUEEN (DELWORTH)

SUNKIST (YODER BROS.)

VAUGHAN'S CHRYSANTHEMUM ROOTED

CUTTINGS—Novelties—Continued

BROCADE (Yoder Bros.). A lively cameo pink daisy that blooms naturally with Masterpiece, November 15. The variety is of extremely easy culture. Its free, vigorous growth makes for top production. It is medium to tall in height, and the strong stems develop big, well branched sprays. The response of Brocade to shading is similar to that of Masterpiece and should be grouped with that variety in the shading program. Brocade is the pink daisy to complement Masterpiece in later shadings and natural flowering. **Price, \$9.00 per 100.**

CAROLYN YOSICK (Shelby Floral). A small, decorative, lavender pink pompon that flowers naturally October 20. Carolyn Yosick gives a sharp and uniform response to black cloth shade and its major value is for August and September flowering. It complements and completes an important trio for early shading—Carolyn Yosick, Pinocchio, and Gold Coast. It has a very dependable growth habit, does not crown like Jewell, and has a much more rigid stem than Jessie and Pink Dot. The small, decorative flower of Carolyn Yosick possesses excellent color-holding quality, and is very satisfactory under even the earliest shadings. Its color is not outstanding in natural daylight but brightens or softens remarkably under artificial lights. We suggest that you wait to evaluate this variety until the reports from the wholesalers are received. **Price, \$9.00 per 100.**

RED RUST (DEPETRIS)

DARK PINK ORCHID QUEEN (Delworth). An intense mauve pink sport from Orchid Queen with the added attributes of increased vigor in both plant and flower. The importance of its value over its parent for early shading has been proven by extensive tests. The color is much deeper. The flower is larger and more fully rounded. The foliage, stem and height of the plant are larger and stronger than the original. Dark Pink Orchid Queen should rapidly take a prominent position in the list of good standards. **Price, \$9.00 per 100.**

LAKME (Depetris). A small, glistening white pompon that matures normally November 12. It possesses a hard, durable, formal flower that easily satisfies the most critical demands for keeping and shipping quality. Its trim, smart appearance is enhanced by a chartreuse eye. The habit of growth is free, wiry and the dark, rigid stems develop a productive compound spray. In growth habit and cultural requirements it closely resembles Cassandra. Its black cloth response is rapid and just nicely follows Pinocchio in the shading program. It lends itself well to out-of-season flowering and has been outstanding in the Cornell trials. High, uniform production and the height of quality in its floral make-up assure Lakme a position of eminence in any list of early profitable white pompons. **Price, \$9.00 per 100.**

OMEGA (Yoder Bros.). A deep lemon yellow pompon maturing December 10, just nicely following Sunnyside. Omega combines an exceptionally strong, vigorous habit and beautiful dark, glossy foliage with a rigid, wiry spray. The formal flower possesses unusual substance and keeping quality. No blindness has ever been apparent and tests indicate a very high degree of resistance to Verticillium. Omega in its natural season complements Sunnyside by extending the season of top quality yellow pompons. It is equally valuable on raised benches or ground beds. On the latter with late planting and lights it is easily had for Christmas. It has been successfully lighted into February flowering.

Unhesitatingly we recommend Omega as the best pompon to follow Sunnyside. **Price, \$9.00 per 100.**

RED RUST (Depetris). An exquisitely colored, well rounded, large pompon, blooming November 5. The color is a beautiful blend of orange, red and chrome bronze similar to Natoma. The habit of growth is clean, uniform, and vigorous with excellent foliage and well branched sprays. The scintillating color is an epoch in chrysanthemum breeding but it is sensitive to intense light and is, therefore, best adapted to later greenhouse shadings and natural flowering. It possesses greater vigor and is easier to grow than Natoma. The production excels that of Navaho. **Price, \$9.00 per 100.**

SUNKIST (Yoder Bros.). An intense golden yellow single that flowers normally with Vibrant December 20, for the Christmas season. The variety lends itself to wide variations in culture and dependably produces a profitable crop. Like Vibrant, Yukon, and Rosalind it is well suited to late planting and ground bed culture. In preliminary trials it has responded very satisfactorily when lighted for delayed flowering. Easily grown and readily sold, Sunkist fills a real demand for golden Christmas daisies. **Price, \$9.00 per 100.**

KOLKWITZIA Amabilis (Beauty Bush)

OUR shrubs are nursery-grown and are transplanted every two or three years. They are nice, shapely bushes with plenty of good fibrous roots, and are such plants as are in demand by the first class retail trade. They should not be compared to stock that is never moved from the cutting or seeding beds until sold.

Our Nursery is located at Western Springs, 15 miles west of Chicago, on the C. B. & Q. R. R., two blocks south of 47th Street, on Wolf Road.

Visitors are invited to inspect our stock at any time. We have a choice lot of specimens such as are not usually seen. Our customers will be pleased with the class of stock we send them.

Shipping Directions: All stock is sold F. O. B. Western Springs. Packing charges to be added on all orders for shrubs, dormant roses, fruits, trees, evergreens, and vines, at cost. Always give full explicit shipping directions, as our responsibility ends on delivery to the express or freight office in good condition. All trees, shrubs and plants shipped subject to customer assuming risk regarding his own State Nursery Inspection Regulations. Certificate furnished with each shipment.

Where personal selection of stock is made at our Nursery we charge according to its value.

BROCCOLI

Green Sprouting Calabrese. 70 days. The best strain for Market, Home Garden or freezing, suitable in north or south. 18 inches tall; branching, forming compact head of bluish green flower buds. After the main head is removed smaller heads are produced from the branches which continue to the end of the season. Pkt., 15c; oz., 40c; ¼ lb., \$1.35; lb., \$4.00.

CABBAGE YELLOW-RESISTANT

We offer the best resistant strains of cabbage seed through the cooperation of some of the best cabbage experts in the district of Racine, Wisconsin. Wherever the yellows disease has been known, we advise the use of resistant varieties. As a second precaution, everyone should give the hot water treatment to cabbage seed to insure freedom from black rot. Just before planting soak the seed for 30 minutes in water heated to 122° F.

Bugner. 100 days. This is the most popular of all the green types of cabbage for Market, Home Garden, Kraut and storage. It is one of the heaviest for size of head, being firm, tender and excellent quality. 8 inches round, flattened slightly, deep through, 7 inches, weighing 10 pounds or more, outer leaves deep purplish green with a tight folded leaf covering the head. Pkt., 25c; oz., 75c; ¼ lb., \$2.25; lb., \$6.50.

Globe. 75 days. A solid round headed resistant. Glory of Enkhouser Cabbage. Stem medium short particularly valuable for kraut. Pkt., 15c; oz., 45c; ¼ lb., \$1.45; lb., \$4.25.

Jersey Queen. 60 days. Very similar to Early Jersey Wakefield, but bred for resistance to yellows. Pkt., 15c; oz., 45c; ¼ lb., \$1.45; lb., \$4.25.

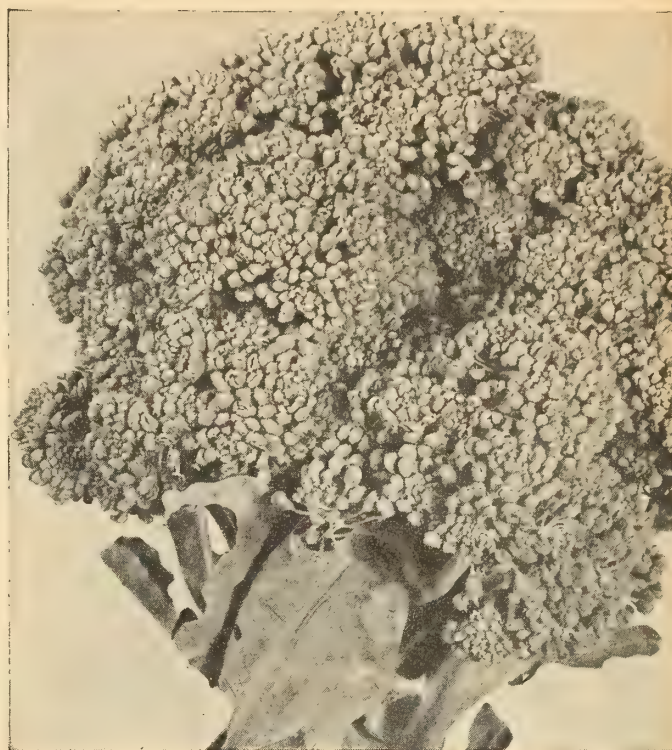

Red Yellows Resistant. 100 days. While this is not quite as large as the Long Island Mammoth Rock Red strain, it is darker and more uniform; being yellows resistant, is safer to grow. All sections of the country are becoming infested with yellows so it is important that resistant strains be more extensively used. Pkt., 15c; oz., 65c; ¼ lb., \$1.65; lb., \$5.00.

Marion Market. 75 days. The third yellows-resistant cabbage to mature. Of an excellent Copenhagen Market type, though later than select Copenhagen, coming a short time before Glory of Enkhouser. Pkt., 15c; oz., 45c; ¼ lb., \$1.45; lb., \$4.25.

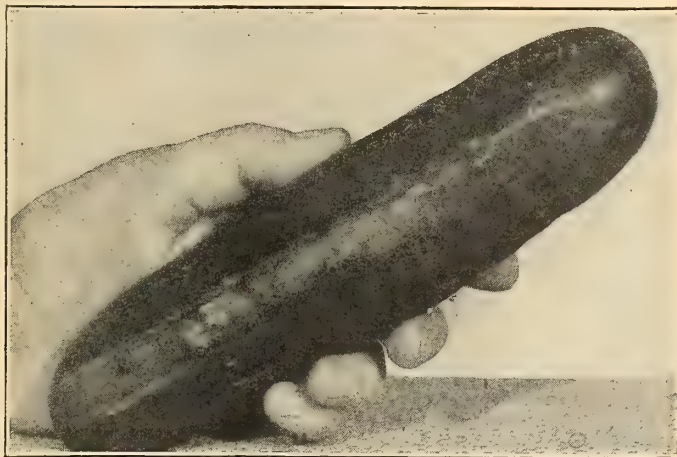

Golden Acre.

Matures in about 60 days. This early round headed variety is slightly earlier than our reselected extra early Copenhagen Market and is similar in most other respects, except that its heads are slightly smaller, weighing 4 to 5 lbs. Oz., 45c; ¼ lb., \$1.40; lb., \$4.00.

GOLDEN ACRE DANISH GROWN. Oz., 50c; ¼ lb., \$1.65; lb., \$5.00.

BROCCOLI ITALIAN GREEN SPROUTING

CUCUMBER CUBIT—Best Market Cucumbers

CUCUMBER

Cubit. 65 days. A dark colored and well rounded cucumber with a fine flavor. The seed cavity is very small and the flesh remains firm several days after maturing. White spined. Pkt., 10c; oz., 35c; ¼ lb., \$1.00; lb., \$3.00.

The Vaughan. 74 days. The largest of outdoor cucumbers, it is also of first table quality. Compared to other Long White Spine varieties, it is much darker in color, more uniform in shape and size, thinner, and more prolific. It is the ideal American forcing variety, as well as an outdoor sort. Pkt., 10c; oz., 30c; ¼ lb., 75c; lb., \$2.25.

Colorado, or "A and C." 68 days. A beautifully long, slender, dark green cucumber of excellent shape and intense dark color which is maintained longer than in any other variety. Fruit is inclined to taper, especially at stem end. Seeds form late in season and are few. White spined Pkt., 10c; oz., 30c; ¼ lb., 75c; lb., \$2.25.

Cauliflower

Chemical Weed Killers

New Dandykill with Nitrogen

Careful tests of Dandykill, the dry, soluble form of the miracle weed killer 2,4D have developed these important facts:

1—That chemical nitrogen in the Dandykill solution will stimulate growth so grass quickly spreads to vacant spaces left by dying weeds.

2—That Dandykill at normal strength destroys many seeds of crab grass and kills small crab grass plants.

3—That Dandykill one-half recommended strength used on bent greens and lawns, kills most weeds without injuring the grass, though occasional brief discoloration may result.

Dandykill offered this year contains a concentrated form of nitrogen quickly soluble in water, in an amount which will not burn the grass leaves, but will produce immediate acceleration of growth.

Experiments show that weeds may be divided into three classes, according to their resistance to Dandykill.

CLASS 1—WEEDS EASY TO KILL

The following weeds succumb to Dandykill solution of one-half recommended strength, safe to use on bent grasses and clover.

New Greenhouse Insecticides

Sodium Selenate Makes Plants Poison Insects

Sodium selenate, which Dr. W. E. Blauvelt of Cornell University told a florists' meeting at Cornell University, "is out of the experimental stage," when applied to the soil in a greenhouse bench is absorbed by the plants, and makes them poisonous to insects.

Over 18,000 pounds have been used in 1946, sufficient to treat over a hundred fifty million square feet of greenhouse bench area. One treatment of the soil is effective for three to six months.

Not all insects are affected. It works best with soft plants like chrysanthemums, carnations, gladioli, cyclamens, saintpaulias, etc., and has not been found entirely effective on woody plants. It kills red spider and aphid on chrysanthemums and carnations, cyclamen mites on chrysanthemums and saintpaulias, foliar nematodes and midge on chrysanthemums.

Complete instructions for use are sent with the material and must be followed closely.

PURE SODIUM SELENATE is a granular powder, very concentrated: One pound treats 1,800 square feet of bench area. This material is completely water-soluble. 100 grams (makes 1 gallon) prepaid \$1.50; per lb., \$4.00; 100 lbs., \$350.00. By express, charges collect.

P-40 IS TWO PER CENT SODIUM SELENATE and ninety-eight per cent carrier (superphosphate in the present material). It is a dilute material. Three pounds treat only 100 square feet of bench area. 3 lbs., \$1.50 prepaid; 25 lbs., \$4.25; 50 lbs., \$8.00; 100 lbs., \$14.00, by express, charges collect, 2,000 lbs., \$240.00.

AZOFUME 70 (AZOBENZENE)

The new fumigant for controlling Red Spiders on roses. Price per 5 lb. package, \$10.00; 10 lbs., \$17.50; 25 lbs., \$37.50; 50 lbs., \$62.50; 100 lbs., \$100.00.

AZOFUME 100. (Technical grade 100% Azobenzene). For use in electric or kerosene lamps generally used for fumigating with naphthalene compounds. Use in exactly the same manner as Fulex and other type vapors. Price, 5 lbs., \$13.00; 10 lbs., \$22.85; 25 lbs., \$48.75; 50 lbs., \$81.25; 100 lbs., \$130.00.

AZOFUME 10 (Dusting Form). We consider this dust as an ideal addition to the Azobenzene family. Where small pockets of spider occur in greenhouses on carnation and roses, dusting with Azofume 10 fills in. Also recommended for outside use on phlox, roses and evergreens. Price 4 lb. pkg., \$2.00; 50 lbs., \$17.50.

AZOFUME 45 CANDLES. Now you can fumigate easily and simply with Azofume in candle form. Merely light them, and after the flame has spread a few seconds, the flame is extinguished and the candle smoulders for about an hour. Each candle treats approximately 6000 cubic feet of greenhouse space; about one pound of candles to 25,000 cubic feet. No need to split the treatment into two or more applications. **AZOFUME 45** is effective on red spiders, cyclamen mite and most other types of mites found in greenhouses on **ROSES, CARNATIONS, MUMS, CYCLAMENS, CALLAS, HYDRANGEAS, GARDENIAS, CAMELIAS, GERANIUMS, IVIES, KALANCHOES, AGERATUMS, CINERARIAS, PRIMULAS, COLEUS** and many other plants, 24 Candles to a carton for \$10.80; 96 Candles to a case for \$43.20.

POST-WAR FUNGICIDE

FERMATE. This new fungicide which has been thoroughly tested gives remarkable control of plant diseases, with safety to all plants. Reliable specific for black spot on roses, leaf spot on chrysanthemums, snapdragon rust, anthracnose of tomatoes, and brown rot of cherries. Recommended for use against all fungi and mildews. 3 lbs., \$3.25; 10 lbs., \$10.00; 25 lbs., \$22.50, shipped by express, charges collect.

BLADEN. After its capitulation, our scientists were sent into Germany to investigate their pre-war and wartime progress in all fields of research, including insecticides. One of the most outstanding discoveries was the German substitute for nicotine, a chemical combination of Ethyl Alcohol and Phosphoric Acid (Hexa ethyl tetra phosphate); they called it "Bladen". This chemical is new, and too much is not known about it. However, it has shown unusually good control of most insects affected by nicotine products which are now so difficult to procure. In addition it gives very good results on Red Spider mites and their eggs. Price per gallon, \$10.00; 5 gals., \$47.50; 50 gals., \$425.00.

Protexall Combats All Plant Pests

PROTEXALL, introduced by us last year as a one-shot spray or dust using new post-war insecticides and fungicides to combat almost all insects and plant diseases with one treatment, has been remarkably successful.

Against roses, notably plagued by pests of both descriptions, a veteran rose grower reports: "Protexall Dust on my roses has been 100 percent effective as to aphids, virtually 100 percent as to fungous diseases; then following the June blooming season when the rose midge usually appears but this year did not, I had 90 percent of the normal July bloom as compared with 10 percent which has been the rule for 10 yearspast."

PROTEXALL CONTAINS

D. D. T., which kills most garden insects.

ROTENONE, fatal to aphids, bean beetles, and all others which may be unharmed by D. D. T.

FERMATE, harmless to all plants, and giving complete protection from many pests which resist other materials.

SULPHUR, which deals with most troubles which fermate does not.

Protexall spray is a powder which mixes easily with water. Protexall Dust comes mixed with a spreader and is ready for instant use. It is necessary to order the form you prefer and have the equipment to use, since the spray material does not make an efficient dust, and the dust cannot be used as a spray.

PROTEXALL SPRAY, 1 oz. package retails at 35c, price per carton of 24, \$5.04; 4 oz. package retails at \$1.00, per carton of 12, \$7.20; 5 lb. package, \$9.00. 1 oz. will make approximately 4 gallons of spraying solution.

PROTEXALL DUST, 1 lb. package retails 75c, price per carton of 24 packages, \$10.80; 4 lb. package retails at \$2.00, per carton of 12, \$15.84; 50 lb. bags each, \$22.50.

D. D. T.-Yamtox

Use of DDT alone seems to have a tendency to increase the infestation of other insects that it does not control. This may be due to killing off desirable parasites, or freeing them from competition. DDT Yamtox contains the full complement of rotenone necessary for the control of red spiders and other mites, thrips and aphids. The incorporation of 5% DDT in it widens its range of use to the satisfactory control of tarnished plant bug and leaf rollers. Where the plants are easily damaged, or where it is desired to spray open flowers of mums, or to dip the entire plant, as in the case of cyclamen mite, Yamtox DDT sure fits the bill.

Yamtox is a concentration of the active principles of the Yam Bean (*Pachyrhizus erosus*). The Yam Bean affects many insects in much the same manner as Rotenone and seems to be the nearest approach to it. It has been used for centuries in the control of pests on vegetables in some parts of China. In Yamtox the toxic effects of the bean are extracted to make them as available as possible. They are further strengthened by chemicals of proven toxicity. Especially recommended for the control of Plant Lice, Red Spider, Thrip, Cyclamen Mite, Cabbage Worms, and most other insects that are controlled by Rotenone. It is very mild upon Plant Growth and safe to use even on most tender plants. Price per gallon, \$12.00; case of 6-1 gallon cans, \$11.00 per gallon.

GRAIN-O. For rooting Cuttings, Bulbs; Treating Seed. For rooting just dip basal end of cuttings or bulb in powder. Or, for bigger yield at amazing low cost, just dust Grain-O powder on all your garden and field seed. It inoculates it with hormones and vitamins; makes bigger rooted, drouth resistant plants; encourages healthier growth, increases yield. For corn, costs only 1/2c to 4c an acre. Packet sufficient for average garden retails 25c; 2 dozen in colorful display card, shipping weight, 1 lb. 11 oz. price \$3.60 per display; 20-in-one size, package retails \$1.50; carton of 10, \$9.00; 1 lb. size, retails \$3.95, per carton of 10, \$24.00.

Freshly Packed and Tested Lawn Seed in 1948 for Your Unsold 1947 Stock

Federal Seed Law Requires Dated Germination Tests

OUR dealers can purchase cartons and 5-lb. bags of our branded seed with no fear of carrying over outdated seed into the following year. We will allow unsold packages to be returned to us and replace them with freshly packed and tested seed the following spring.

Dealers who have tried this plan report that it enables them to keep up stocks and get maximum sales throughout the season with no fear of inventory losses.

This offer is NOT in any way to be considered on a consignment basis but is solely for the protection of our dealers against having to carry into the following year unsalable, outdated and soiled cartons.

The terms of payment are absolutely the same as heretofore.

This offer does not apply in any way whatsoever to bulk seed or non-branded seed and this is in no way to be considered a guarantee sale. All seed to be exchanged must positively be returned to us prepaid by December 1, 1947, and replacement will be made by March 1, 1948.

NOTE—We cannot accept broken cartons and wet or otherwise damaged seed for exchange.

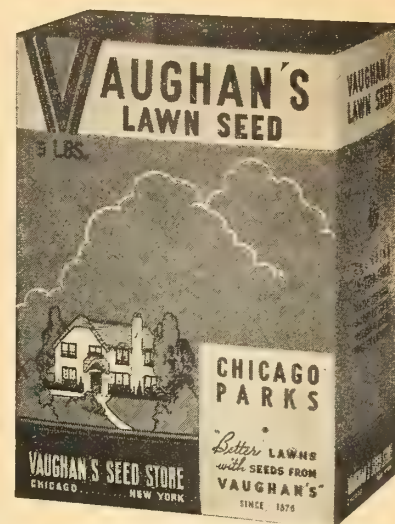

For Your Protection

All our grass seeds are carefully analyzed in our own fully equipped laboratory and tagged or labelled to conform to the complicated requirements of the state laws. Errors in labelling might be costly and troublesome. Play safe.

With each of the deals below we furnish the vividly colored window streamer illustrated on the opposite page.

Vaughan's No. 25 Lawn Mixture An Economy Mixture Containing NO TIMOTHY

This blend fills the demand for a mixture which is both inexpensive and at the same time free of objectionable timothy so widely used as a lawn seed adulterant. Our No. 25 has, as its chief ingredient, the grass which is used for winter putting greens on southern golf courses. It comes up as quickly as timothy, will last longer and makes a fine appearance if kept cut.

VAUGHAN'S GLADIOLI are famous. For years they have been nationally advertised. You have only to put this box on your counter to sell out quickly.

We use **FIRST SIZE BULBS**, the size which sells best over the counter. The 10 named varieties (50 each) of good named varieties. The price to you is \$20.00 for the box and 500 bulbs of 10 named varieties. You retail them for \$1.00 a dozen, or more, because the selection is worth more, doubling your money. Each variety is packed 50 in a bag labeled with its name. You empty one bag into a compartment, and refill in the same manner when it is empty. This prevents mixtures and loss of bulbs. After the display box and first collection have been bought, refill orders will be accepted for \$19.50 for 500 bulbs, 50 each of 10 varieties, in bags of 50; or \$38.00 for 1,000 bulbs, 100 each of ten varieties. Colored pictures are provided to paste on the compartments. This box keeps the bulbs in the open air, thus preventing bacterial rot which comes when they are sealed in cartons. The named varieties are kept apart without mixing, which adds greatly to their value. Varieties Subject to Change Without Notice.

Dwarf California Giants Improved

VAUGHAN'S BLEND

In this remarkable strain, flowers of the largest size are borne on plants of dwarf habit, a combination which is ideal for pot culture and bedding. Flowering begins early, when the plants are very small, so that salable plants are quickly produced. Plants sell on sight. They are bushy, grow about 12 in. high and produce their immense open faced, deeply ruffled flowers freely. Some are self colors veined in a contrasting shade, some combine two or more colors in the same flower in a wonderful color harmony. The dark rich colors predominate. $\frac{1}{2}$ Trade pkt., 75c; Trade pkt., \$1.25; $\frac{1}{64}$ oz., \$2.50; $\frac{1}{32}$ oz., \$4.50; $\frac{1}{16}$ oz., \$8.00.
